**Portfolio :** https://sandesh-naikwade-portfolio.onrender.com

## Objective

Computer Engineering student with an 8.88 CGPA and hands-on experience in Python, SQL, Data Analysis, and Machine Learning. Familiar with Generative AI, LLMs, RAG, prompt engineering, and AI-powered automation. Seeking a Data Science / AI role to build intelligent solutions and drive data-driven decision-making

## Skills

- **Programming Languages:** Python, SQL, Java
- **Data Science & Machine Learning:** EDA, Statistical Analysis, Feature Engineering, Predictive Modeling, Model Evaluation, Model Deployment
- **Generative AI & LLMs:** RAG, LLM Integration, Prompt Engineering, LangChain, Hugging Face, Groq API, AI Agents
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, TensorFlow, Flask, FastAPI
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools & Cloud:** Git, GitHub, AWS (EC2, S3, SageMaker)
- **Core Concepts:** OOP, DSA, DBMS, Probability & Statistics

## Experience

**Eduskills | Data Science Intern | Jan 2026 – March 2026**

- Completed a 10-week Data Science program applying Python, SQL, EDA, statistical analysis, and machine learning to practical datasets.
- **IBM Customer Churn Prediction:** Analyzed 7,000+ customer records and developed an ML model achieving 91% accuracy and 89% F1-score using feature engineering and ensemble learning.
- **Smart City Energy Analytics:** Analyzed 120,000+ energy records across 15+ features, achieving 98% $R^2$ with Multiple Linear Regression and reducing prediction error by 20%.

## Education

Bachelor of Engineering in Computer Engineering | NMIET, Pune (SPPU) 2023 –2027

- **CGPA: 8.88 / 10.0**
- **Data Science Honors : 10/10 (till 6th sem)**

## Projects

**Multi-Agent AI Research System | Python, LangChain, Groq API, Tavily, Streamlit**

- Built a multi-agent AI research pipeline integrating **4 stages**: web search, content extraction, report generation, and AI-based critique using Groq LLMs and Tavily.
- Automated research report generation with source links, quality evaluation, and evidence-gap analysis through an interactive Streamlit dashboard.

**AI Video Assistant with RAG | Python, LangChain, Mistral AI, Whisper, ChromaDB, Streamlit**

- Developed an AI-powered video analysis assistant that transcribes YouTube videos and audio/video files, generates concise summaries, and extracts action items, key decisions, and open questions.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using LangChain, Hugging Face embeddings, and ChromaDB to enable context-aware conversational Q&A over video transcripts, with an interactive Streamlit interface.

## Certifications & Achievements

- **Machine Learning Specialization** – Stanford Online / DeepLearning.AI (Andrew Ng)
- **Google Data Analytics Professional Certificate** - Coursera
- **AWS Cloud Practitioner Essentials** - AWS SkillBuilder
